Rimbunan Hijau Academy introduces new skills courses

SIBU: Rimbunan Hijau Academy (RHA) recently launched two new skills programmes for Food and Beverage Service Operations and Pastry Production.

Both programmes are syllabus for Level II of the Malaysian Skills Certification (SKM).

RHA spokesman said students who register early for the programmes would get a discount on their fees.

“These programmes encompass both practical and theory learning – students will attend classes for eight months, followed by another three months of practical

training.”

He said the programmes would equip students with the essential skills and knowledge to make them more hands-on and competent in the food service industry.

Students would also know the way to handle pastry products in accordance with the standard operating procedures (SOPs) after the course.

“These skills are essential for their future, to withstand all circumstances and challenges in the industry.”
